<i>Book Review</i>	
TRAGIC VOICES <i>Ann Scales</i>	283

Erratum

The article by Professor Stephen Carter that appeared in our previous issue contained an unfortunate numerical error on page 380. The hypothetical presented there should have read as follows:

If proceeding with the research is worth \$50,000 to the university, then a risk-neutral museum with one chance in 100 of suffering \$1,000,000 worth of harm, would get something between \$10,000 and \$50,000 to shut up and go away.

The *Yale Law & Policy Review* regrets any confusion this mistake may have caused our readers.
